

The SAGA School is excited to welcome students on campus to enjoy SAGA's annual four-week Summer Camp series! This year's theme is **Spass mit Freunden und Kokosnuss!** We look forward to our normal camp fun, but there will be a strict health and safety protocol in place to lower the risk for spread of COVID-19.

The SAGA School Summer Camp Protocol focuses on practices for children and staff based on The Washington State Department of Health Summer Day Camp guidelines. In order to attend camp, families must be willing to adhere to the protocol. If a child or parent is unwilling to follow the protocol detailed below, the SAGA School reserves the right to withdraw their spot in the camp, without the guarantee of a refund.

SAGA Summer Camp Health and Safety Protocol:

- It is encouraged that the same family member drop off and pick up the child each day. We ask parents to wear cloth face masks at pickup and drop-off
- At drop-off and pickup: use marks on the ground to social distance
- Children should not come to school if they are feeling ill. If a child has any cold symptoms, they need to stay home. Children cannot be given fever-reducing or allergy medication and attend the summer camp program
- At drop-off, parents will need to **verbally confirm the items on the Health Screening Checklist** (page 3), and the child's temperature will be taken by a staff member prior to entering the building
- Parents will drop off and pick up their child at a specified entrance of the building. A member of your group's staffing team will be at the assigned door to receive the child and walk them to the classroom. Social distancing needs to be practiced during drop-off/pickup
- Drop-off and pickup times for different groups will be staggered to prevent gatherings at the entrances
- Student personal items will be kept in the cubby in the classroom and not on the hooks in the hallway
- Please talk to your child or show your child pictures of persons with face masks in advance. SAGA staff will be required to wear masks on campus. Students will be given a face mask to wear or they can bring their own, but it is optional for them. (Preschool parents, a Kids Hat with Protective Face Shield [available on Amazon] is also suggested.)
- Practice proper handwashing with your child so that they know the process
- Practice with or explain to your child why it is important to keep fingers out of your mouth and to maintain distance from other students in the classroom

SAGA Summer Camp Protocol for Families

- Students will attend camp using one assigned classroom and will use one assigned bathroom throughout the day. There will not be cross-usage of classrooms / multipurpose rooms
- Children will be assigned to a group of 10 (2 teachers + 8 students OR 1 teacher + 9 students) and will remain with that group throughout the week
- Outdoor time is recommended and part of camp programs. Children will wash their hands before and after playtime and will be limited to usage of a designated area of the playspace
- Staff will practice frequent cleaning and disinfecting procedures throughout the day as recommended by the King County Department of Health
- Students will be asked to practice physical distancing within each group, as much as possible
- Lunch and snacks will be eaten in the classroom or outside
- If a child exhibits symptoms of illness during the camp day, the child will be moved to a quarantined area until the child can be picked up, and the family will need to refer to the “Returning to a child care facility after suspected COVID-19 symptoms” plan
- SAGA camps will continue throughout the summer as long as SAGA can provide a standard of care and staffing is available

(Daily) Health Screening Checklist

(Parents must verbally consent to the following at drop-off)

I confirm my child does not have any of the following today (or if your child is new to the program, within the past 3 days):

Shown signs of COVID-19:

Fever of 100.4 F or higher or a sense of a fever

Shortness of breath not connected to another health problem

Cough not connected to another health problem

Chills or repeated shaking with chills

Muscle pain not connected to another health problem or another activity such as physical exercise

Headache

Sore throat

New loss of taste or smell

Unusual fatigue

Congestion/running nose - not related to seasonal allergies

Nausea/vomiting/diarrhea

Taken medication to reduce a fever before coming to care

My child is considered high risk due to certain health conditions

My child has been in close contact with someone who has confirmed or suspected COVID-19

If your child has met any of the above criteria, notify a SAGA Staff Member immediately (either tell the staff member accepting your child at drop-off or call the school prior to arrival: 206-442-2023). Your child will not be able to attend summer camp if the health screening fails. You will need to follow the "Returning to a child care facility after suspected COVID-19 symptoms" plan.

Please inform a SAGA Staff Member if your child has someone in their household with one or more of the above signs.

SAGA Summer Camp Protocol for Families

Returning to a child care facility after suspected COVID-19 symptoms:

Determined symptoms while on campus:

If a child or staff member develops signs of COVID-19, such as a fever of 99 F or higher, cough or shortness of breath **while on campus**, that person will be placed in a room away from the well people (designated room: the gym) until the sick person can leave the building.

Arrives to campus with a symptom:

A staff member or student who exhibits signs of COVID-19, such as a fever of 99 F or higher, cough or shortness of breath upon arrival to the school will not be allowed to attend camp. Those with COVID-19-like symptoms should isolate themselves at home and not return to the facility until 3 days (72 hours) after their fever is gone (without fever-reducing medication) and symptoms get better.

Person under Suspicion or with Confirmation of COVID-19:

A staff member or student who has signs of suspected or confirmed COVID-19 can return to the child care facility when:

- At least 3 days (72 hours) have passed since recovery – defined as no fever without the use of medications and improvement in respiratory signs like cough and shortness of breath;

AND

- At least 10 days have passed since signs first showed up.

Close Contact with a Confirmed COVID-19 Individual:

If a person believes they have had close contact with someone with COVID-19, but they are not sick, they should watch their health for signs of fever, cough, and shortness of breath during the 14 days after the last day they were in close contact with the sick person with COVID-19. They should not go to work, child care, school, or public places for 14 days.
